

CS 440 Meeting Minutes

Quiz Platform

Date: 09/13/2026

Convened: 16:10

Adjourned: 17:45

Present: Anh, Pronob, Anindo, Nick, Ulugbek, Taha

Absent: None

Scribe: Anh

Agenda

- Reports on Collaborative Development
- Determine tech stacks for the project
- Discuss SRS: who is going to do what, structure
- Set a new meeting time
- Next Steps

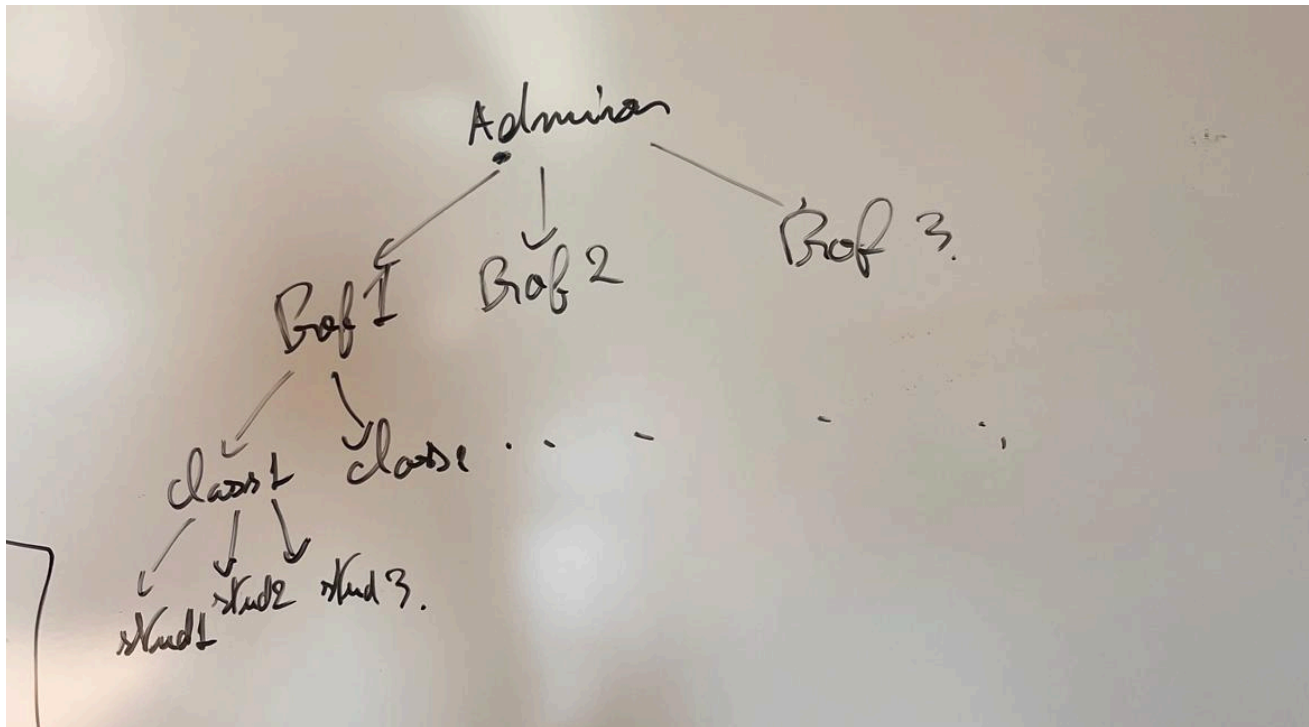

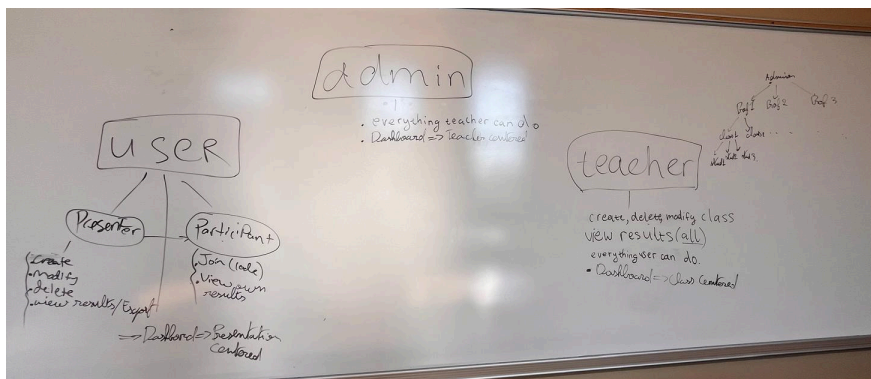

Reports

- Each member completed their assigned Collaborative Development parts; the system is currently hosted online. Verified everything is working end-to-end.
- Tech stacks members are familiar with:
 - Frontend: React
 - Backend: Python + FastAPI
 - Database: SQL – can host MySQL on CS server
- Later: status of quizzes (draft, finalized); teachers should only have access to the finalized ones

Decisions

- New meeting time: 8-9 PM every Wednesday
- MVP - a quiz platform that can:
 - Creators make the quiz
 - Present the quiz (lobby)
 - Participants can join
 - Exportable results
- MVP:
 - Admin is developers

- Users: presenter and participant
 - Dashboard:
 - 2 tabs: joined and owned (created)
 - Presenter:
 - Create, edit, delete access
 - Share and host quiz
 - View results of all participants of the quiz
 - Export results into Excel
 - Participant
 - Join by code
 - Answer the questions
 - View one's results □ results
- Login: users create a Gettysburg account (single sign-on)
- Final:
 - Everything on MVP
 - Teachers:
 - Everything users can do
 - Dashboard: Classes Center
 - Admin:
 - Everything teachers can do
 - Has access to view all teachers and classes
 - Dashboard: Teacher Center

- SRS:
 - Nick: Front Matter and Section 1
 - Pronob: Section 2
 - Taha: Section 3 and Sections 5.1 through 5.2
 - Anindo: Section 4 and Sections 5.3 through 5.4
 - Anh: Sections 5.5 through 5.6
 - Ulugbek: Sections 5.7 through 5.8 and Section 6
 - All six members should review the final combined document for consistent terminology, numbering, formatting, and matching features between Sections 3 and 5.

Next Steps

- Each member works on the SRS according to their assigned parts and finishes the SRS draft by the Wednesday (09/16) meeting.
- Set up time with Professor Kim (TBD) to go through the SRS and align what we are working on

- Set up time with Professor Ilinkin (TBD) to add more details if needed

Application of Course Content

- Version control: by setting up the Collaborative Development project, we learnt how to use GitHub to manage branches, create PRs, and assign reviewers to review the code. When conflicts are present, we can also resolve them and merge into main.
- SRSs are closely related to design documents, so we considered the doc's audience, what to include, etc.
